

Ricoh Power Requirements

To assist in the installation of equipment under the Ricoh contract, please refer to the information below to find the correct electrical outlet for your model.

All multifunctional equipment uses a typical household 120 Volt, 15 Amp socket except the following models:

Ricoh Models: IM7000 and IM8000

- The required wall outlet is a **NEMA 5-20R** (receptacle)
- Input voltage level: 110 - 120 V, 60Hz: 20A

Ricoh Models: IM9000, PRO5300 and PRO8300

- The required wall outlet is a **NEMA 6-20R** (receptacle)
- 208v to 240v, 50/60 Hz: More than 20A. Single Phase.
